

1MWh Data Center Cabinet for Port Use

Overview

Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.

Why are cabinets important in a data center?

Cabinets are one of the most important items in any data center that house different types of IT equipment. We offer different type of cabinets. When selecting a cabinet, it is critical to choose one that can adapt to your IT equipment needs and support your infrastructure to function in the most energy-efficient way possible.

What size server & network cabinets are available?

With the most extensive array of sizes ranging from 42-52RU, heights of 600mm to 800mm (23.62" to 31.5"), and depths of 36" to 54", providing server and network cabinets that meet any specific requirements.

Are custom cabinet configurations available in IBX® data centers?

Custom cabinet configurations available in International Business Exchange™ (IBX®) data centers globally. Fully enclosed, secured, and interconnected data center environments for custom, multi-cabinet deployments. Work with our industry-leading engineering experts to design, build, and optimize your critical data center environment.
