

1MWh Data Center Rack Turnkey Project

Overview

Could '1 megawatt racks' transform data center power architecture?

The OCP community is exploring radical redesigns of data center power architecture, including the concept of "1 Megawatt racks" that would move power supplies out of server racks into separate rack units. Eventually, power generation capabilities could move entirely outside the computing floor to become integrated with the data center facility.

Will Google's Project Deschutes CDU unlock 1 MW data centre racks?

Google says its Project Deschutes CDU can unlock 1 MW data centre racks with liquid cooling, and it will share the full design with the OCP later this year. At the 2025 OCP EMEA Summit yesterday, Google unveiled its fifth-generation liquid-cooling CDU for next-gen AI data centres. It looks like what a mad scientist would come up with.

Could '1 megawatt racks' reduce energy losses?

The Open Compute Project Foundation (OCP) is spearheading a radical redesign of data center power architecture to support AI's explosive growth, including the concept of "1 Megawatt racks" that could reduce energy losses from 40% to just 7%.

What needs to change to enable 1 mw racks?

Cooling systems aren't the only thing that needs to change to enable 1 MW racks. Power supply systems are another critical component. Flex is currently working on 400 volt (V) direct current (DC) systems, and Butler said it's already eyeing 800V DC and even 1500V DC for the future.

TAX FREE

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
