

220V Power Storage Cabinet for Wind Power Generation Product Manual

Overview

How many inverters are in a 125kW PCS cabinet?

The 125kW PCS cabinet includes one 125kW PCS comprised of two 62.5kW energy storage inverters. The 250kW PCS Cabinet includes two 125kW PCSs comprised of two 62.5kW energy storage inverters each. The PCS inverter dimensions are shown in the following figure.

How many kWh is a battery cabinet?

The total nameplate energy of each battery cabinet is 279.55 kWh, the string nominal voltage is 998.4 V, and the voltage operation range is 873.6 V to 1123.2 V. The liquid-cooling chiller is equipment that can control the temperature of the antifreeze liquid of the energy storage battery and reduce the environmental humidity.

How do I power on a PCS cabinet?

The power-on procedures are as follows: When the grid voltage is present, turn ON the AC fused disconnect or circuit breaker on the utility side. Confirm that 480 Vac voltage is present on the PCS cabinet's AC terminals. NOTE: Do not turn on the QF1A or QF1B breakers (QF1B is in 250 kW PCS cabinet).

What is the power range of energy storage PCSs?

Operating DC voltage range with full power: 750-1100 V DC. Charging and discharging: Energy storage PCS can operate in grid-forming and grid-following modes. Both modes allow battery charging and discharging. The CPS ES series ESS implements a modular design concept.
