

# 350kw pv distribution for subway stations

## Overview

---

This MV turnkey solution integrates two PV inverters, step up transformer, switchgear, low voltage distribution panels and monitoring equipment. It is delivered fully furnished for Plug & Play installation at Project site. Protections and communications included.

This MV turnkey solution integrates two PV inverters, step up transformer, switchgear, low voltage distribution panels and monitoring equipment. It is delivered fully furnished for Plug & Play installation at Project site. Protections and communications included.

Solis' Skid Solution supports larger scale projects to simplify implementation and work seamlessly with our 1500 VDC PV string inverters (250-350kW). We reduce complexity by placing all supportive architecture for your large project on a single skid. This MW Station can serve up to 4.2MW sites with.

The SolaX X3-GRAND HV is a 350kW ground-mounted string inverter delivering 99% efficiency with 6 MPPT trackers for optimal energy harvest. It features Type II SPD protection, AFCI (optional), and PID mitigation for enhanced safety. Its 1500V DC input and PLC communication ensure wide compatibility.

All the elements for a multimewatt system are incorporated into a single platform. This solution has been especially conceived for the North American market, as it features one, two or three UL1741-certified outdoor central inverters. Maximize your investment This compact and flexible solution.

The CPS 350 kW three-phase string inverters are designed for large-scale ground mount applications. The units are high performance, advanced, and reliable inverters designed specifically for the North American environment and grid. High efficiencies, wide operating voltages, broad temperature.

- Supports bifacial PV modules with max. PV current 22.5A Max. PV input voltage .
