

5G micro-site power cabinet rack type direct sales

Overview

What are 5G outdoor cabinets?

5G outdoor cabinets, also referred to as 5G outdoor cabinets or 5G outdoor enclosures, are boxes designed to house and protect the electrical equipment to support 5G-LTE technology. Made of metals, plastics or a combination of the two material types, 5G outdoor equipment enclosures serve the following primary purposes.

What makes a 5g-lte micro a good telecommunication enclosure?

The 5G-LTE series 'MICRO' is engineered to provide the same safeguards as its larger versions but at a condensed size. Expect exceptional resistance to environmental factors such as intense heat, extreme cold, and heavy rain. DDB answers the call with the durability and reliability of a telecommunication enclosure but in a smaller size.

What is a 5G enclosure?

Equipment protection: An enclosure's primary purpose is to protect 5G cables and equipment from damage caused by environmental and physical conditions. The cabinet is mechanically robust and sealed, preventing costly damage from weather conditions, impacts and other factors.

What are the best ratings for outdoor network cabinets?

The most commonly used ratings for outdoor network cabinets are those from the National Electrical Manufacturer Association, an organization that sets standards for electrical components. The NEMA rating system defines the environments in which people can safely use an electrical enclosure.
