

# 5MWh Intelligent Photovoltaic Energy Storage Cabinet for Base Stations

## Overview

---

What is UEI-bess-2.5mw / 5MWh?

The UEI-BESS-2.5MW / 5MWh is a turnkey containerized energy storage solution engineered for grid-scale and commercial energy management. Housed in a prefabricated 40ft container, the system integrates 2.5MW power conversion, 5MWh of high-voltage LFP batteries, a step-up MV transformer, and full monitoring and safety infrastructure.

What is 5MWh+ energy storage equipment?

5MWh+ energy storage equipment leads to the design of long modules and large packs. The larger packs pose greater challenges to the pack's structural strength, heat dissipation temperature distribution, and safety design.

How many MWh can a 20 ft battery storage system produce?

The DC sides of the battery clusters are connected in parallel and then connected to the DC side of the PCS. The energy of a single cabin can reach more than 5MWh. Compared with the mainstream 20-foot 3.72MWh energy storage system, the 20-foot 5MWh energy storage system has a 35% increase in system energy.

How many batteries are in a 5MWh+ battery cabin?

However, a small number of units, such as Sungrow, have adopted a single-side door opening design to further increase the energy density of the energy storage system. According to industry experts, most of the 5MWh+ battery cabins adopt centralized topology and liquid cooling and heat management. There are 12 battery clusters in the whole cabin.

## 5MWh Intelligent Photovoltaic Energy Storage Cabinet for Base Station
