

690V Lithium-ion Battery Energy Storage Cabinet Used in Spanish Emergency Rescue

Overview

What is a lithium-ion battery storage cabinet?

DENIOS presents its Energy Storage Cabinet specifically crafted for Lithium-Ion batteries, ensuring secure containment and charging. These meticulously designed lithium-ion battery storage containers guarantee comprehensive safeguarding, including 90-minute fire resistance against external sources.

Are there safety cabinets for lithium ion batteries?

There are safety cabinets that are used exclusively for the passive storage of batteries, as well as those that allow both the storage and charging of lithium-ion batteries. ION-LINE passive storage safety cabinets offer a standard 90-minute fire resistance rating both from the outside to the inside and vice versa.

Are lithium battery storage cabinets fireproof?

Constructed from powder-coated sheet steel, they incorporate a tested, liquid-tight spill sump to manage battery leaks that may catch fire. These fireproof lithium battery storage cabinets also feature self-closing doors and high-quality oil-damped door closers, further enhancing safety measures.
