## Overview

---

What is a small BESS cabinet?

**Small BESS Cabinets** The small BESS series is a fully integrated battery energy storage system that's built to last. The Series is both scalable and engineered for modularity with a low MTTR, making it ideal for medium renewable energy projects.

How do I build a Bess all-in-one cabinet?

**Steps to Build a BESS All-in-One Cabinet** 1. **Planning and Design** Determine the power capacity (kW) and energy storage capacity (kWh) required for the system. Decide on the use case (residential, commercial, or utility-scale) to ensure the system meets the specific needs. Choose the battery technology (lithium-ion, LiFePO4, etc.).

Why should you choose a Bess cabinet?

**Ease of Deployment:** The plug-and-play design of the All-in-One Cabinet and the modularity of the BESS Cabinets enable rapid deployment and seamless integration into existing energy systems.

What is a large Bess cabinet?

**Large BESS Cabinets** Our large bess Series features an AC single bay module capable of 29.7kW with options available up to 1MW clusters. These modules are perfect for on-grid solutions, providing reliable power for your applications. They are fully customisable and versatile, suitable for almost any on grid application.
