

Australia new energy project energy storage

Overview

Sixteen grid-scale battery projects have now been awarded contracts, collectively providing 4.13 GW—or 15.37 GWh—of energy storage capacity scheduled to be operational by 2029.

Sixteen grid-scale battery projects have now been awarded contracts, collectively providing 4.13 GW—or 15.37 GWh—of energy storage capacity scheduled to be operational by 2029.

The projects store up renewable energy generated during the day that can be used during peak periods. What's next?

A researcher says a change in federal energy policy could unnerve investors. A surge in investment in large batteries is helping to safeguard Australia's energy future but experts say.

In early 2025, over AUD 2.4 billion (USD 1.5 billion) went into large-scale battery energy storage systems (BESS). This was the second-highest quarterly investment ever, just behind the AUD 2.8 billion seen at the end of 2023. The Clean Energy Council's Quarterly (Q1 2025) Investment report shows.

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National Electricity Market (NEM) as renewable energy penetration increases. This is according to AEMO's 2025 Transition Plan for System.

Australia's clean energy transition accelerates as the Capacity Investment Scheme secures 4.13 GW of new large-scale battery projects, boosting grid stability and sustainability. Australia's clean energy transformation has gained new momentum with a record-breaking investment in large-scale energy.

Australia has become a global leader in energy storage, driven by the need for renewable energy integration, grid stability, and the transition towards a low-carbon economy. The following article outlines The Best five energy storage projects in Australia, highlighting their capacity, technology.

The project will provide an economic boost to the local area, help to secure

Victoria's energy supply and enable more renewables to enter the system. Learn more about this project and our others via the links below. Tallawarra A High Efficiency Upgrade Hallett Battery Energy Storage System Lake.

Australia new energy project energy storage

New energy projects

We're working on a range of exciting projects geared towards supporting the energy transition. One example is the Wooreen Energy Storage System which will be built before the end of ...

[The Best Five Energy Storage Projects in Australia](#)

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, impressive capacity.

[Wärtsilä will provide a 350 MW / 1474 MWh energy storage ...](#)

This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the integration of renewable energy, aligning with the ...

[Australia: 15.37GWh of energy storage successful ...](#)

Australia's Capacity Investment Scheme (CIS) has awarded 4.13GW/15.37GWh of energy storage capacity in its third tender round.

[Batteries lead in record quarter for new Australian ...](#)

Fifteen new connections applications were received in the last quarter, adding 3.5 GW to the pipeline of projects. Image: Australian ...

[Top five energy storage projects in Australia](#)

Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

[Australia: 2GWh of energy storage reaches ...](#)

The Clean Energy Council of Australia has revealed that large-scale energy storage projects led investment in the second quarter of 2024.

[Vena Energy builds 408MWh BESS at third phase of South Australia](#)

It is located in Tailem Bend, a rural town in South Australia, approximately 85 kilometres southeast of the state capital, Adelaide. Scheduled for commissioning in 2027, it is ...

[Sixteen Energy Storage Projects Power Australia's \\$3.8 Billion ...](#)

Australia's clean energy transformation has gained new momentum with a record-breaking investment in large-scale energy storage systems.

[Australia's grid-forming battery storage](#)

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National ...

[Construction begins at 1.6GWh Melbourne Renewable Energy Hub](#)

Construction has started at Melbourne Renewable Energy Hub, one of the largest energy storage projects in Victoria, Australia.

[Australia fast-tracks over 22 GW of renewable power and storage](#)

The list includes 32 projects of renewable energy generation and storage, as well as 24 transmission projects of national significance that will benefit from a streamlined ...

[Australia: Construction begins at biggest battery ...](#)

The government of Western Australia (WA) announced last week (15 March) that the construction phase has begun at Collie, a ...

[Australia: 15.37GWh of energy storage successful in CIS Tender ...](#)

Australia's Capacity Investment Scheme (CIS) has awarded 4.13GW/15.37GWh of energy storage capacity in its third tender round.

[Edify Energy plans 2.4 GWh solar plus storage project in Australia](#)

Renewables developer Edify Energy has unveiled plans for a major 2.4 GWh solar and integrated battery energy storage facility in Australia, adding to its growing portfolio of ...

[Top 7 Upcoming Battery Energy Storage System Projects in Australia](#)

From the 2.4 GW Denman BESS to the 850 MW Bremer and Waratah Super Batteries, these seven BESS projects Australia alone will deliver tens of gigawatt-hours of storage across New ...

[Tesla to feature in Australia's biggest ever battery project](#)

SEC's latest announcement underscores an increasing reliance on Tesla for large-scale energy storage projects ever since the "Big Tesla Battery" project in South Australia.

[Alinta Energy green lights South Australia's largest ...](#)

Image: Alinta Energy. Energy generator and retailer Alinta Energy has approved the development of the first stage of its Reeves ...

[How Australia's AUD 2.4B Battery Storage Boom ...](#)

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, ...

[Top 7 Upcoming Battery Energy Storage System ...](#)

From the 2.4 GW Denman BESS to the 850 MW Bremer and Waratah Super Batteries, these seven BESS projects Australia alone will deliver tens of ...

[Australia's shift towards long-duration energy ...](#)

Energy-Storage.news delves into long-duration energy storage and how it is helping shape Australia's energy transition.
