

# Australian energy storage vehicle equipment

## Overview

---

Is the koorangie battery energy storage system fully operational?

Understanding connection issues, the urgency of transitioning to net zero, optimal financial structures, and the industry developments in 2026 and beyond. Edify Energy has confirmed that the 185MW/370MWh Koorangie battery energy storage system (BESS) in Victoria is fully operational.

Why do we need balancing energy storage technologies in Australia?

Increasing gap between maximum and minimum operational demand in Australia call for urgent need of balancing storage technologies. Fast response hybrid battery-supercapacitor energy storage are deemed prudent solution for the transition period, while PHES and Hydrogen are for long-term storage.

Are EVs the future of Australia?

Over a fifth of Australia's total carbon emissions are caused by transport. EVs as % of all new vehicles purchased in Australia has increased from 9.5% in 2024. Australia's EV market is set to quadruple by 2030. eLumina is a proud local provider of reliable and efficient EV charging solutions to power Australia's clean energy future.

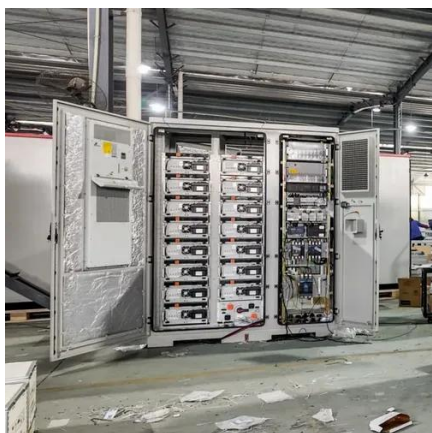

Is Australia's first fully off-grid truck fleet fully operational?

Leading Australian logistics firm Centurion the country's first fully off-grid and 100 per cent renewable energy-powered battery electric vehicle (BEV) truck fleet is now fully operational.
