Will Saudi Arabia develop a solar power plant in Bahrain?

Riyadh-based Acwa Power and Bahrain's state oil firm Bapco Energies have agreed to develop a solar power plant with large-scale battery energy storage in Saudi Arabia's Eastern Province that will supply electricity to Bahrain.

Where is a solar power plant located in Bahrain?

The solar power plant will be located in the southern region of Bahrain, near Bilaj Al Jazayer, covering a total area of approximately 1.2 square km. The project will utilise the latest advancements in solar energy technologies to optimise output and efficiency.

How many gigawatts will Bahrain's solar plant generate?

The solar plant will have generation capacity of up to 2.8 gigawatts, developed over several phases, the companies said in a joint statement on Tuesday. Electricity generated by the plant will be transmitted to the load centre of Bapco Energies in Bahrain, accelerating the country's transition to renewable energy sources.

Is Bahrain transitioning to solar energy projects?

After the establishment of the Sustainable Energy Unit (SEU) in Bahrain in 2014, a radical transition toward launching solar energy projects can clearly be observed. The SEU was established in collaboration between the national government and the United Nations Development Program (UNDP).
