Overview

What is a telecom energy storage system (TESS)?

Ensure seamless telecom operations with GSL Energy's Telecom Energy Storage Systems (TESS). Designed for cell towers, data centers, and network equipment, our telecom battery systems provide reliable backup power, optimize energy use, and reduce costs.

Does GSL energy offer a rack battery backup system?

At GSL ENERGY, our telecom battery backup systems are already deployed across multiple continents, supporting telecom towers, network base stations, and remote telecom hubs. Each rack battery installation is designed for easy integration, stable operation, and minimal maintenance. What is a server rack battery and why is it used in telecom?

.

What is a telecom battery backup system?

A telecom battery backup system is a comprehensive portfolio of energy storage batteries used as backup power for base stations to ensure a reliable and stable power supply. As we are entering the 5G era and the energy consumption of 5G base stations has been substantially increasing, this system is playing a more significant role than ever before.

Should telecommunication operators invest in a telecom battery backup system?

Investing in a telecom battery backup system is always one of the priorities for telecommunication operators in the 5G era. Sunwoda 48V telecom batteries have a capacity covering 50Ah-150Ah, which can easily meet the power backup needs of macro and micro base stations.
