Are battery energy storage systems a success in Germany?

BESS in Germany: Booming success with a built-in ceiling?

Battery energy storage systems (BESS) are experiencing a remarkable upswing in Germany - and quite rightly so. They offer one of the key need that an energy system increasingly characterised by renewable energies needs: short term Flexibility.

Is Berlin battery lab a step for sustainable battery research in Germany?

BAM President Prof. Dr. Ulrich Panne: “The planned establishment of the Berlin Battery Lab is a significant step for sustainable battery research in Germany. Through close cooperation with the Helmholtz Center Berlin and Humboldt University, we are pooling our expertise and creating a unique research infrastructure.

What is the Berlin battery lab (BBL)?

The Berlin Battery Lab (BBL) will combine the strengths of the three partner institutions: BAM has internationally recognized expertise in battery safety and electrochemical energy materials. HU Berlin is a leader in Germany in academic research on sodium-ion batteries. HZB is particularly active in research on lithium-sulfur batteries.

Why is Berlin a good place to study lithium-sulfur batteries?

Berlin has established itself as an important location for research into sodium-ion batteries and lithium-sulfur batteries. The city offers concentrated expertise in these areas, supported by numerous research projects and high-profile research groups.
