Exicom's Outdoor cabinets are designed to protect telecom equipment from external threats in all normal or harsh climatic conditions. Our cabinets have multiple wall structure alternatives – from single-layer wall construction with light design to a multilayer construction designed for more.

At Fibconet, we offer outdoor telecom cabinets in both floor-standing and wall-mount styles, designed to shield your valuable network equipment from environmental elements like water and dust. Our cabinets feature a polyurethane water- and dust-proof door joint strip for additional security.

Outdoor telecom power cabinets are essential components designed to safeguard telecom equipment in external environments. These robust enclosures ensure that telecommunication systems remain powered, operational, and protected from the elements, making them indispensable in the telecommunications.

AZE's 12U outdoor telecom enclosure with 300W air conditioner is designed to house a variety of telecommunication equipment with 19" or 23" rack rails, standard features that include HVAC climate control, they can provide outstanding environment protection from vandalism, dust, rain, snow and.

The outdoor cabinet is one compartment cabinet for installing 19" telecom

equipments. The cabinet cooling use air conditioner and fan, to ensure the equipments operate normally at stable temperature range, so as to make the service life of the equipments much longer and their performance more.
