

# Bhutan stream energy storage project

## Overview

---

Bhutan's project demonstrates how energy storage transforms renewable systems from weather-dependent sources to reliable power providers. For companies working in renewable energy infrastructure, this represents both a challenge and a \$27 billion global opportunity.

Bhutan's project demonstrates how energy storage transforms renewable systems from weather-dependent sources to reliable power providers. For companies working in renewable energy infrastructure, this represents both a challenge and a \$27 billion global opportunity.

Meta Description: Explore how Bhutan's Stream Energy Storage Project leverages hydropower and modern storage solutions to achieve energy stability. Discover its applications, challenges, and global relevance in renewable energy. Bhutan, known as the "Land of the Thunder Dragon," generates over 99%.

With hydropower providing 80% of its electricity, Thimphu's facing a modern dilemma: how to store surplus monsoon energy for dry winters. The Thimphu Power Storage initiative, launched in 2023, aims to solve this through cutting-edge battery systems. But wait, isn't Bhutan already carbon-negative?

Adani Group and Bhutanese energy giant Druk Green Power Corporation (DGPC) announce strategic partnership to develop 5,000 MW of hydropower and pumped storage projects in Bhutan Adani Group and Bhutan's Druk Green Power Corporation (DGPC) have signed a strategic agreement to jointly develop.

A total of 311 applications were received for clean energy or decarbonisation projects after the call for submissions opened last summer. Of these, seven were selected to . 4 ?

?

Through this collaboration, the companies planned to develop at least 5,000 MW of renewable energy projects.

The foundation stone for the hydro power project was launched in the presence of Bhutan's Prime Minister Tshering Tobgay and Adani Group Chairman Gautam Adani. Druk Green Power Corporation (DGPC) of Bhutan will hold a majority 51 per cent stake, and Adani Group will have 49 per cent. In May 2025.

The Adani Group has officially begun the 570 MW Wangchhu Hydro Electricity Project in Bhutan, marking a significant step in its collaboration with Druk Green Power Corporation (DGPC). The foundation stone for the project was laid in the presence of Bhutan's Prime Minister Tshering Tobgay and Adani.
