

Cambodia s wind solar and energy storage new energy industry

Overview

According to the Khmer Times, the approved projects include 12 solar projects, 6 wind projects, 1 biomass and solar combined project, 1 LNG power generation project, 1 hydropower project, and 2 energy storage stations.

According to the Khmer Times, the approved projects include 12 solar projects, 6 wind projects, 1 biomass and solar combined project, 1 LNG power generation project, 1 hydropower project, and 2 energy storage stations.

Phnom Penh, Cambodia – June 12, 2025 – Cambodia is doubling down on its commitment to a sustainable energy future, reaffirming its ambitious goal of increasing the use of renewable energy to 70 percent of its total energy mix by 2030. This significant announcement came during a meeting between.

The Cambodian Council of Ministers have approved 23 new investment projects in the power sector for the period 2024-2029, aimed at addressing the country's ongoing power shortages. The approval was granted during a weekly cabinet meeting chaired by Prime Minister Hun Manet on Friday, September 27.

According to TrendForce, Cambodia is accelerating the development of clean energy to reduce its reliance on imported energy, enhance the country's energy security, ensure reliable and affordable power supply, and help this Southeast Asian nation achieve its goal of having at least 70% clean energy.

Cambodia has taken a big leap in its clean energy transition with the recent approval of two more wind energy projects, signalling a new era for renewable energy in the country. Figures from the Council for the Development of Cambodia (CDC) showed that two more . Wind power is set to be connected.
