

China-africa solar energy storage project

Overview

On Jan 14, the opening day of the 2025 World Future Energy Summit (WFES 2025) in Abu Dhabi, JA Solar signed a 1.25GW module procurement agreement with China Energy Engineering Corporation (CEEC).

On Jan 14, the opening day of the 2025 World Future Energy Summit (WFES 2025) in Abu Dhabi, JA Solar signed a 1.25GW module procurement agreement with China Energy Engineering Corporation (CEEC).

Sunlight is abundant, economies crave reliable power sources, and the technology is becoming massively cheap. According to 2024 data from the International Renewable Energy Agency (IRENA), solar ranks among the cheapest energy sources worldwide, costing just \$0.044 (€0.03) per kilowatt-hour (kWh).

On Jan 14, the opening day of the 2025 World Future Energy Summit (WFES 2025) in Abu Dhabi, JA Solar signed a 1.25GW module procurement agreement with China Energy Engineering Corporation (CEEC). The agreement secures JA Solar as the exclusive supplier of high-efficiency n-type photovoltaic (PV).

Instead, solar and battery systems from China are powering entire businesses, from automobile assembly plants to wineries, gold mines, and shopping malls in Africa's biggest economy. All of this has happened at startling speed. Solar has risen from almost nothing in 2019 to roughly 10% of South.

Moreover, at the Forum on China-Africa Cooperation (FOCAC) in September 2024, China announced plans for 30 new clean energy projects across the continent, but whether this will represent a meaningful departure from hydro-dominant investments remains to be seen. In addition to investments in power.
