

China's wireless solar-powered communication cabinet energy storage

Overview

Are Chinese power inverters being used on solar panels?

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are devices separate from power sources like solar arrays or batteries.

Are Chinese solar inverters hidden inside solar panels?

But the implications were massive. This was just one of several similar discoveries over the past year. According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of these hidden Chinese devices embedded inside.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.
