

Construction of phnom penh new energy storage project

Overview

The proposed project will (i) install a 200 MW/400 MWh of utility-scale BESS at a substation in the north of Phnom Penh to supply ancillary service for stabilizing the transmission grid and improving power quality, avoiding curtailment and (ii) enhance technical and regulatory.

The proposed project will (i) install a 200 MW/400 MWh of utility-scale BESS at a substation in the north of Phnom Penh to supply ancillary service for stabilizing the transmission grid and improving power quality, avoiding curtailment and (ii) enhance technical and regulatory.

The proposed project will (i) install a 200 MW/400 MWh of utility-scale BESS at a substation in the north of Phnom Penh to supply ancillary service for stabilizing the transmission grid and improving power quality, avoiding curtailment and (ii) enhance technical and regulatory capacity of EDC for.

Cambodia's Phnom Penh Energy Storage Power Station isn't just another infrastructure project - it's rewriting the rules of energy security in developing economies. As of March 2025, this 485MW/1,940MWh lithium iron phosphate (LFP) facility has become operational, storing enough electricity to power.

ricity across all sectors in Cambodia. Secondly, to strengthen energy security by reducing the dependency on energy imports and maximizing the development of domestic energy resources. Thirdly, to increase the share of clean energy, including renewable and variable renewable energy, and energy.

ity-scale energy storage system provided. The project will support EDC in installing the first utility-scale battery energy storage system (BESS) in Cambodia. The BESS will be capable of storing 16 megawatt-hour.⁵ This is a desirable size to support the a ulted from energy supply and consumption.

In Phnom Penh, Cambodia is advancing its energy storage capabilities through several initiatives:A utility-scale battery energy storage system is being piloted, funded by a \$6.7 million grant, which is part of a broader effort to enhance the power grid¹.The Cambodian government has approved 23.

The global industrial and commercial energy storage market is experiencing

explosive growth, with demand increasing by over 250% in the past two years. Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North.
