

Cost of a 20kW Outdoor Solar Cabinet in Australia

Overview

According to data from Solar Choice's installer network database, a fully installed 20kW system will cost roughly \$15,000 – \$22,000 as of August 2024.

According to data from Solar Choice's installer network database, a fully installed 20kW system will cost roughly \$15,000 – \$22,000 as of August 2024.

20kW solar power systems are becoming an increasingly worthwhile and attractive investment for small to medium businesses (or households with very large energy consumption) across Australia, with payback periods in the 3-5 year range in most parts of the country. This article provides an overview.

I created a guide for you to map the full 20 kW journey—up-front price, panel count, roof area, national price index, energy output, rebates, payback maths, comparisons with 22 kW, popular alternative sizes, and key buying safeguards—so homeowners and businesses can gauge value fast with Fordan.

For a comprehensively designed, high-quality system fully installed in the Melbourne area, the typical 20kw solar system price ranges from \$16,000 to \$25,000, after the federal STC rebate is applied. This price point reflects a significant energy asset, one that marks the transition from a standard.

A 20kW commercial solar PV system is ideal for businesses with low to medium energy usage. Rising grid electricity prices make this an even more attractive option. Should you have sufficient roof space, a 20kW solar system can also be outfitted into larger residential homes to effectively boost.

How Much Energy Will a 20kW Solar System Produce?

The exact energy production from a 20kW solar system will vary based on your location, panel direction, roof tilt, and even the weather. On average, systems of this size can generate anywhere from 70 to 88 kWh per day, which is enough to fully power.

A 20kW solar system in Australia costs \$17,500 – \$22,600, produces around 78 – 90 kWh per day, and typically suits large homes or commercial sites aiming to save \$6,200 – \$7,800 per year, depending on usage and feed-in tariffs. What is the

daily output of a 20kW solar system?

A typical 20kW.
