

# Czech Solar Energy Storage Cabinet Power Distribution

## Overview

---

Is the Czech Republic ready for pumped-storage hydroelectric power plants?

Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped. There are six localities considered for new pumped-storage hydroelectric power plants in the Czech Republic but public acceptance presents a challenge. Front-of-meter installations in the Czech Republic are mired in regulations.

How is the Czech energy sector governed?

3.2.1 The Czech energy sector is governed by a wide range of laws and regulations implementing European legislation. The main regulation is Act No. 458/2000 Coll., on conducting business and government supervision of the energy sector (Czech Energy Act).

Why is Czech energy-accumulation so expensive?

According the report, the main reason is the regulatory framework biased in favor of classical energy models. The Czech Republic is no exception. It is fair to say that none of available energy-accumulation technology is perfect yet, and cost-effectiveness can be reached under specific conditions only.
