

Czech solar power system

Overview

The had almost two (GW) of capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.

How much photovoltaic capacity does the Czech Republic have?

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before.

How many solar parks are there in the Czech Republic?

There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp. The development of wind energy in the Czech Republic also continues apace.

Why is solar energy so unpopular in the Czech Republic?

Solar energy has long been unpopular among Czech politicians since high compensation led to an uncontrolled boom in solar in 2009-2010, costing around 1.8 billion of euros in subsidies per year to the sector split between consumers and the government. The bill also raises special taxes paid by solar plants built in 2009-2010.

How is the Czech energy sector governed?

3.2.1 The Czech energy sector is governed by a wide range of laws and regulations implementing European legislation. The main regulation is Act No. 458/2000 Coll., on conducting business and government supervision of the energy sector (Czech Energy Act).
