## Overview

---

Choose from 250kW up to 500kW total PCS power ratings and capacities ranging from 500kWh to 2200kWh. All-in-one design contains battery racks, PCS, EMS, HVAC, UPS, controls, networking, fire suppression system and redundant safety systems within the container.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

Sodium-ion batteries are entering commercial production with 20% lower costs than LFP, flow batteries are demonstrating 10,000+ cycle capabilities for long-duration applications, and emerging technologies like iron-air batteries promise 100+ hours of storage at costs competitive with natural gas.

Our offering extends beyond the battery storage system itself. We provide full, turnkey high-voltage grid integration, leveraging our world-class portfolio of substations, transformers, and Blue HV products including switchgear. Overall, Qstor™ by Siemens Energy provides a comprehensive, end-to-end.

Large-scale energy storage systems are the backbone of our evolving power grid – sophisticated technologies that capture excess electricity when it's abundant and deliver it precisely when needed. Think of them as massive reservoirs for electricity, enabling the reliable integration of renewable.

The top energy storage technologies include pumped storage hydroelectricity, lithium-ion batteries, lead-acid batteries and thermal energy storage. Electrification, integrating renewables and making grids more reliable are all things the world needs. However, these can't happen without an increase.

Cutting-edge, fully integrated, 3-phase 480V battery energy storage system with

EMS. Optional equipment includes microgrid controller and automatic transfer switch. Designed to support time-of-use (TOU) arbitrage, demand charge management, microgrid, PV self-consumption, resiliency, and more.
