## Overview

---

The call received 1,750 applications, which forced an increase of almost 17% in the initially planned allocation of €700m (US\$818m) to €818m (US\$956m) from the European Regional Development Fund (ERDF 2021-2027) across the 126 projects.

The call received 1,750 applications, which forced an increase of almost 17% in the initially planned allocation of €700m (US\$818m) to €818m (US\$956m) from the European Regional Development Fund (ERDF 2021-2027) across the 126 projects.

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems. The goal is to improve how Spain uses renewable energy.

The Spanish Ministry for Ecological Transition and the Demographic Challenge recently announced the selection of 126 energy storage projects that will receive a total of €818.3 million in funding from the European Regional Development Fund. The call for proposals received 1,750 applications, and.

Spain's storage landscape is diversifying with BESS and pumped hydro projects across multiple regions, led by major utilities and new market entrants, and a connection pipeline that signals an accelerated rollout towards PNIEC targets. The Ministry for the Ecological Transition and the Demographic.

The country's groundbreaking battery storage program has exceeded its original €700 million budget, growing to €840 million (\$964 million) to support a massive storage capacity expansion. This program represents a crucial step in Spain's journey toward energy independence and renewable energy.

The Spanish Minister for the Ecological Transition and the Demographic Challenge (MITECO) has selected 126 projects with a combined capacity of 2.2 GW/9.4 GWh on its call for aid for storage investment projects (MITECO press release, 30/12/2025). The call received 1,750 applications, which forced.

Endurance Motive, a Valencian firm specializing in lithium batteries, has closed the sale of its first 5.015 kWh megabattery, the first manufactured entirely on the peninsula and destined for a solar project in Las Palmas de Gran Canaria - City

Life, History & Island Vibes This is a milestone for. What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Why should Spain invest in energy storage?

Investing in energy storage helps Spain meet its climate goals. This includes achieving carbon neutrality by 2050. Storing renewable energy instead of wasting it helps the country rely less on fossil fuels. This also cuts down greenhouse gas emissions. Pumped hydro, thermal storage, and battery systems are effective technologies.

How many energy storage projects did ESS select?

Battery energy storage systems accounted for 124 of the selected projects, while 17 involved thermal or power-to-heat storage and three were pumped hydro sites. To continue reading, please visit our ESS News website. This content is protected by copyright and may not be reused.
