Overview

What is a B2U EPs cabinet?

large-scale grid-connected energy storage systems without incurring repurposing costs. B2U's EPS cabinet enables plug and play reuse of EV battery packs without incurring repurposing costs. Cabinets are designed to electrically and mechanically integrate 2nd life EV battery packs from a variety of EVs while achieving required UL9540 certification.

What is an EPS cabinet controller?

Each EPS Cabinet Controller (ECC) manages the charging, discharging, connection and disconnection of battery packs. With real time monitoring, the EPS cabinet controller ensures batteries operate within guardrail settings. The controller manages climate control and hazard detection in each cabinet.

How does B2U's EPs cabinet controller work?

In B2U's system, weaker batteries don't restrict the performance of stronger batteries. Each EPS Cabinet Controller (ECC) manages the charging, discharging, connection and disconnection of battery packs. With real time monitoring, the EPS cabinet controller ensures batteries operate within guardrail settings.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.
