

Eu outdoor solar power hub factory

Overview

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you'll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.

Can European solar production underpin resilience?

A new market analysis from SolarPower Europe highlights the potential of European solar production to underpin the resilience of the European sector. SolarPower Europe has published a new report mapping Europe's solar PV module production equipment capacity.

How many companies in Europe manufacture solar PV modules?

Today, at least 38 companies are active in Europe manufacturing the equipment and machinery that produces vital steps of the solar PV module supply chain, including cells, ingots, wafers, and polysilicon. EU Clean Industrial Deal: Opportunity for renewables and European manufacturing.

What is the European solar PV industry alliance (ESIA)?

The European Solar PV Industry Alliance (ESIA) aims to facilitate and de-risk the scaling up of Europe's solar PV manufacturing to cover 30 GW of domestic manufacturing capacities by 2025, thus supporting the EU's decarbonization targets and at the same time ensuring long-term competitiveness of the EU industries.
