

Fixed type of IP54 outdoor cabinet for weather stations

Overview

What is a vanguard® outdoor weatherproof IP rated (IP54 to IP65) enclosure?

Our Vanguard® outdoor weatherproof IP Rated (IP54 to IP65) enclosures offer a modular product range in multi bay, multi height and multi depth options, with the flexibility to house a broad range of equipment in a variety of industry standard mounting formats.

Can IP54 enclosures be used outdoors?

Yes, IP54 enclosures can be used outdoors, but only in light weather conditions. They protect against dust and splashes, so they're fine under awnings or in sheltered spots. For heavy rain or full exposure, a higher rating like IP65 or IP67 is better.

Why do companies use IP54 enclosures?

Industrial Control Systems: Factories and workshops use IP54 enclosures to protect PLCs, electrical panels, and sensors from dust and light moisture. This helps machines run safely and smoothly. Telecom Equipment: In telecom setups, these enclosures keep routers, hubs, and outdoor cables safe from the weather.

Are IP54 enclosures waterproof?

IP54 enclosures can handle water splashes from any direction, like light rain or cleaning spray. Just keep in mind—they are not waterproof, so they shouldn't be used in heavy rain or underwater. They're built to be tough. IP54 enclosures can handle bumps or knocks, which makes them a good choice for factories or busy work areas.
