

Georgia energy storage solar battery cabinet lithium battery pack processing

Overview

Empowering your business with scalable commercial battery storage systems — from lithium-based cabinets to large-scale commercial solar battery storage systems for solar integration and energy security.

Empowering your business with scalable commercial battery storage systems — from lithium-based cabinets to large-scale commercial solar battery storage systems for solar integration and energy security.

Georgia Power, the largest electric subsidiary of Southern Company, announced that construction is underway on 765-MW of new battery energy storage systems (BESS) located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties. The BESS projects were authorized by the Georgia Public Service.

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

These storage options include batteries, thermal, mechanical, and more. The Center of Innovation works as an advisor to companies making advancements in storage, which is impacting energy distribution and transmission systems (the smart grid), the reliability and availability of energy resources to.

Battery energy storage systems (BESS) are designed to address these challenges by storing excess renewable energy when demand is low and releasing it when demand is high. This capability promotes a steady and reliable supply of electricity, regardless of the variability in renewable energy.

Georgia Power senior VP and senior production officer, Rick Anderson, cuts the ribbon on the utility's first 65MW BESS project in 2024 alongside Kim Greene, president and CEO of Georgia Power (second from right), with Georgia Public Service Commissioners Tim Echols (left) and Fitz Johnson. Image:.

Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. Georgia Power included attachments with.
