

# Gross profit of battery pack

## Overview

---

What is the profit margin for dynamic storage batteries in 2023?

The profitability of the company's dynamic storage batteries is stable. The company's gross profit margin for power batteries in 2023 will be 14.37%, a year-on-year increase of -1.59 pct, and the gross profit margin of energy storage batteries will be 17.03%, a year-on-year increase of +8.07 pct.

How is battery pack manufacturing cost calculated?

The manufactured cost of a battery pack is calculated with input from the design information generated in modeling the cell and battery pack performance. The design modeling determines the annual materials and purchased items requirements.

How much will China's consumer battery revenue be in 2023?

The company's consumer battery revenue in 2023 will be 8.362 billion yuan, a year-on-year increase of -2%, and the gross profit margin will be 23.73%, a year-on-year increase of -0.95pct. We estimate that the company's 2024Q1 consumer battery revenue will be about 2 billion yuan, a decrease of about 15% month-on-month.

How will dynamic storage battery shipments evolve in 2023?

The company's dynamic storage battery shipments maintain a rapid development trend. In 2023, the company's total shipments of dynamic storage batteries will reach 54.4GWh, +88% year-on-year, and in 2024Q1, the shipment of dynamic storage batteries will be 13.5GWh, +44% year-on-year and -25% month-on-month.
