

High-temperature resistant installation solution for off-grid bess cabinets

Overview

Built for reliability in any climate: Designed for extreme conditions, our solutions operate flawlessly in temperatures ranging from -25°C to $+50^{\circ}\text{C}$. With up to 800V DC power supply, they connect directly to battery systems - eliminating the need for power conversion.

Discover AZE's advanced All-in-One Energy Storage Cabinet and BESS Cabinets - modular, scalable, and safe energy storage solutions. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid.

Individual pricing for large scale projects and wholesale demands is available. up power supply.

Liquid cooling is the best thermal management solution to improve battery pack performance. Unlike other cooling methods, our advanced active water cooling technology ensures uniform temperature distribution across battery cells, reducing energy consumption, preventing overheating, and enhancing.

Whether you're powering an off-grid system or managing a compact, high-density BESS installation, our cooling technologies are built to maintain ideal battery temperatures and ensure efficient, reliable operation in any environment. The DMC 8.0 is a high-performance, door-mounted liquid chiller.

AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system.

The iCON 100kW 215kWh Battery Storage System is a fully integrated, on or off grid battery solution that has liquid cooled battery storage (215kWh), inverter (100kW), temperature control and fire safety system all housed within a single

outdoor rated IP55 cabinet. This industrial and commercial.
