If you already have an energy storage system, the BOSS Cabinet can bring auxiliary battery power to your system. Each BOSS.12 System can hold up to twelve PHI-3.8-M Batteries to expand your system to a total of 45.6kWh. Encased in a carbon-steel enclosure the BOSS.12 Cabinet is NEMA 3-R rated.

Consider the amount of electricity you consume daily and what appliances or systems you intend to power with your storage. Do you need a system to cover peak demand times, provide full backup during outages, or store excess solar generation?

Answering these questions will help determine the.

Home batteries store electricity from your solar system or the grid for use during outages, when the grid is most expensive, or at night when it is dark. A well-sized system can keep essential appliances running, lower your utility bill and protect you from grid disruptions. Here is how to estimate.

For renewable system integrators, EPCs, and storage investors, a well-specified energy storage cabinet (also known as a battery cabinet or lithium battery cabinet) is the backbone of a reliable energy storage system (ESS).
