

# How to choose a portable power bank

## Overview

---

How to choose a portable charger or power bank?

In conclusion, when choosing a portable charger or power bank, consider the capacity, charging speed, portability, compatibility, safety features, brand and quality, USB ports, and built-in cables. By considering these factors, you can choose a power bank that meets your needs and ensures that your devices stay charged and ready to use.

How to choose a power bank?

Look for a power bank with at least 2 USB charging ports on it. That way, you can charge your phone and another device at the same time. Usually, the charging ports on a power bank will have different charging outputs, so that you can charge larger devices at the same rate as smaller ones.

Are power banks portable?

When it comes to portability you'll need to consider two aspects: weight and volume. They are both generally directly proportional to the device's capacity. Thus, the more mAh a power bank has, the heavier and bulkier it tends to be.

Should you buy a power bank?

Although power banks appear to be simple devices at first sight, they do have a multitude of features most buyers might not be aware of. And what usually starts as a quick 10-minute shopping session, can easily end up in paralysis-analysis that drains several hours before a decision is reached.
