

How to fix the power supply in the battery cabinet

 **TAX FREE**    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

Should you repair or replace a faulty power supply?

Deciding whether to repair or replace a faulty power supply can be a challenging task for anyone involved in electronics engineering. A systematic approach can help guide one's decision, taking into account various factors that influence the outcome. One key aspect to consider is the cost-effectiveness of repairs compared to a complete replacement.

How to repair a broken power supply?

Repairing a broken power supply is just kicking the can further down the road. The best approach is to replace the unit altogether with a new, reliable, and efficient power supply from a reputable source like Bravo Electro. But nonetheless, let's talk about how to repair a broken power supply yourself.

How do you test a power supply after a repair?

After the repair, test the power supply to verify that the issue has been resolved. Use a multimeter to measure the output voltage and confirm it matches the specifications. Whether you're dealing with power supply issues or need help tackling hydraulic or mechanical repairs, AES has the experience to deliver lasting results.

Is DIY power supply repair a good idea?

DIY repairs can be a cost-effective solution, but they also come with a higher level of risk. Attempting to repair a power supply requires a certain level of knowledge and experience with electronics and power supplies in order to be safe and avoid further damage.

How to fix the power supply in the battery cabinet

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (Ah):6
Rated energy (Wh):76.8
Maximum charging voltage (V):14.6
Maximum charging current (A):6
Floating charge voltage (V):13.6-13.8
Maximum continuous discharge current (A):10
Maximum peak discharge current @10 seconds (A):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):-50
Discharging temperature (°C):-20-+60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100%doD): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):50*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds
