

Huawei bloemfontein large energy storage cabinet

Overview

How can Huawei help tackle decarbonisation?

“As decarbonisation takes place, innovative players like Huawei want to collaborate with governments to find long-term solutions to issues like energy poverty and security.” One way to do this is with tools that change how energy is used at the household level. 55% of all energy on the continent is used to run homes.

How can Huawei improve energy performance?

Huawei can address this with optimisers that boost performance by up to 30%. Smart Guard accessories enable intelligent energy management with features like remote scheduling across devices.

Does Huawei have a warranty?

“Huawei’s home energy products come with a 10-year warranty. The ability to run remote diagnostics means that you’ll never need to have a technician at your house for a repair,” says Lusson. “We also have a policy of providing full replacement when warranty issues are found,” he adds.
