

# Huawei site energy product department

## Overview

---

Huawei Site Power Facility delivers site power solutions with high efficiency, integrating power supply, management, and protection to support resilient, low-carbon operations.

Huawei Site Power Facility delivers site power solutions with high efficiency, integrating power supply, management, and protection to support resilient, low-carbon operations.

The blade power supplies and lithium batteries are widely used in macro/micro sites. The system uses free cooling thanks to an original butterfly design and bionic root heat dissipation. The ultra-lean structure enables 1 blade per site while keeping reliability, helping cut TCO and carbon.

Barcelona, Spain (ANTARA/PRNewswire)- At the Product & Solution Launch during MWC Barcelona 2025, He Bo, President of Huawei Data Center Facility & Critical Power Product Line, unveiled the next-generation site power facility architecture "Single SitePower" and the AI data center construction.

The energy world will be centered on electricity, with green hydrogen becoming a major player by 2030. The solar PV and energy storage industries will develop rapidly, expanding from a few countries to the entire world. Power plants will generate electricity from renewable sources in lakes and.

Single SitePower is a next-generation intelligent solution architecture for site power facilities. It adopts a unique three-level synergy mechanism covering site power facilities, wireless networks, and power grids to implement bidirectional interaction of power and information flows in the.

Huawei recently showcased its next-generation digital and intelligent site power facility solution, Single SitePower, at the 9th Global ICT Energy Efficiency Summit in Dubai. This solution is set to drive the intelligent transformation of ICT energy infrastructure. Held under the theme 'Green Site.

Single SitePower is a next-generation intelligent solution architecture for site power facilities. It adopts a unique three-level synergy mechanism covering site power facilities, wireless networks, and power grids to implement bidirectional interaction

of power and information flows in the. What is Huawei site power facility?

Huawei Site Power Facility delivers site power solutions with high efficiency, integrating power supply, management, and protection to support resilient, low-carbon operations.

What is a Huawei outdoor power system?

The ultra-lean structure enables 1 blade per site while keeping reliability, helping cut TCO and carbon emissions. Huawei outdoor power solutions are designed for carrier ICT sites. The all-in-one system supports multiple input (grid/PV/genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes.

Why should you choose Huawei power subracks?

Energy efficiency management & AI synergy with power can reduce energy consumption and carbon emissions. Remote O&M can reduce site visit which can save maintenance cost. Proactive management can avoid risk for high power supply reliability. Huawei power subracks support a wide range of AC input and DC output.

What makes Huawei a reliable data center?

Reliable: Huawei believes that high-quality and safe lithium batteries should be the top consideration to ensure reliable communication. From general-purpose computing to AI computing, data centers need to resolve four major challenges: reliability, uncertainty, rapid delivery, and high power demand.
