

# India mumbai cabinet solar deployment plan

## Overview

---

What are the recent achievements of India in solar energy?

About Recent Achievements of India in Solar Energy: India achieved 100 GW of solar capacity as of January 2025, aiming for 500 GW of renewable energy by 2030. Solar energy now contributes 47% of total installed renewable capacity, showing its dominance in clean energy. A 3,450% increase in solar capacity from 2.82 GW in 2014 to 100 GW in 2025.

How much solar energy does India need?

As of Feb. 28, 2025, India's installed solar capacity stands at approximately 102.57 GW, contributing significantly to its renewable energy mix. To meet the 500 GW target, solar energy will need to contribute nearly 300 GW, highlighting its critical role in the nation's clean energy transition.

Does India have a solar energy sector?

India's solar energy sector has witnessed exponential growth over the past decade, driven by government initiatives, private sector investments, and a growing demand for sustainable energy solutions. As of Feb. 28, 2025, India's installed solar capacity stands at approximately 102.57 GW, contributing significantly to its renewable energy mix.

Can India reach 280 GW of solar energy by 2030?

However, India remains well positioned to achieve its ambitious solar energy targets despite existing challenges. With a goal of reaching 280 GW of solar capacity by 2030, the country must add approximately 36 GW annually over the next five years.

## India mumbai cabinet solar deployment plan
