

Introduction to spain s new solar air conditioner

Overview

Should you install air conditioning in Spain?

Summers in Spain can be extremely hot, and the high temperatures can take a lot of getting used to for expats, particularly those from cooler countries such as the UK. If you are considering installing air conditioning in Spain, knowing the types of systems available, their costs, and the latest regulations is essential.

What are the different types of air conditioning units in Spain?

There are several different types of air conditioning units and choosing the right one is key to finding the option that is the best and most affordable fit for you. The split system is the most common type of unit in Spain.

How much does air conditioning cost in Spain?

10 hours a day costs €1.94, which is €58.20 per month – a realistic figure for many households. 24-hour use costs €4.65 per day, adding up to about €139.68 per month. These figures explain why many homeowners in Spain want to know how much does air conditioning cost to run in Spain.

How to choose a cooling system in Spain?

Cooling capacity: In Spain you will hear about “frigorías”, the unit of cooling power. But other factors also matter: room size, number of people, outside temperature and sun exposure. Energy efficiency: Look for models with A+++ ratings to keep running costs as low as possible.
