

Ireland s Government Procurement of Automated Distribution and Energy Storage Cabinets

Overview

The procurement scheme, initiated by EirGrid—the island’s transmission system operator (TSO)—comes as part of the broader Electricity Storage Policy Framework, which was published in 2024 to drive Ireland’s energy transition and meet ambitious 2030 climate targets.

The procurement scheme, initiated by EirGrid—the island’s transmission system operator (TSO)—comes as part of the broader Electricity Storage Policy Framework, which was published in 2024 to drive Ireland’s energy transition and meet ambitious 2030 climate targets.

Facing challenges with renewable integration, Ireland’s new scheme offers a clear path for developers needing planning permission and approval. Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country’s renewable.

Grid scale electricity storage is vital in securing an electricity grid capable of exploiting the opportunities provided by the fast pace of Ireland’s renewable generation programme and supporting the future growth of Ireland’s industrial sectors. In line with our Climate Action Plan commitments, we.

Irish grid operator EirGrid set the proposed minimum procurement for long duration energy storage procurement at 201 MW, well below its initial 2030 goal of 500 MW of storage capacity. Energy Storage Ireland called for more ambition and a longer contract length to reflect international standards.

Deputy Pa Daly asked the Minister for the Environment, Climate and Communications if he will provide an update on the development of long-duration energy storage in Ireland; and if he will make a statement on the matter. [17834/25] In line with CAP Action EL/24/16, the Electricity Storage Policy.

Long Duration Energy Storage (LDES) can play an important role in supporting the transition to a highly renewable electricity system and the delivery of Ireland’s Climate Action Plan (CAP)¹ electricity system related targets. LDES capability and targeted service delivery could help accommodate.

Ireland’s energy sector is undergoing a crucial transformation, with EirGrid’s

October 2025 consultation on the Long Duration Energy Storage (LDES) Procurement Mechanism marking an important milestone for storage developers and investors in this space. EirGrid is aiming to launch the LDES. What is the electricity storage policy framework for Ireland?

In line with CAP Action EL/24/16, the Electricity Storage Policy Framework for Ireland (ESPF) was published by my Department in July 2024. The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition.

What is Ireland's energy transition policy framework?

The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Actions #6 to #10 of the policy framework are designed to stimulate the development of the optimum level of electricity storage systems, including Long Duration Electricity Storage on to the grid network by 2040.

What is EirGrid's long duration energy storage (LDEs) procurement mechanism?

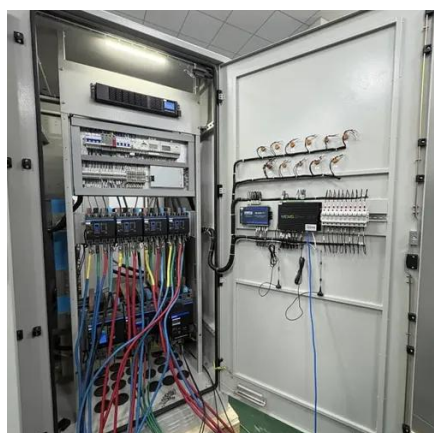

In line with Action #6, EirGrid, in conjunction with the Regulatory Authority, are developing a procurement mechanism for long-duration electricity storage, through their Long Duration Energy Storage (LDES) product. The LDES product is in its initial stages with 2 separate public consultations expected in 2025 and 2026.

Is Ireland's energy sector undergoing a transformation?

Ireland's energy sector is undergoing a crucial transformation, with EirGrid's October 2025 consultation on the Long Duration Energy Storage (LDES) Procurement Mechanism marking an important milestone for storage developers and investors in this space.
