

Kuala Lumpur off-grid bess cabinet supplier 500kw

PUSUNG-R (Fit for 19 inch cabinet)

Overview

What is a Bess energy storage system?

The 10' and 20' systems are designed and shipped with the batteries pre installed utilizing UN 3536 shipping standards. Each BESS container has either a 300kW or 500kW PCS system offering a complete, install ready energy storage system. All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages.

What is a Bess Solar System?

Designed with either on-grid (grid following) or hybrid (grid forming) PCS units, each BESS unit is capable of AC coupling to new or existing PV systems making them an ideal solution for commercial/industrial customers. The 10' and 20' systems are designed and shipped with the batteries pre installed utilizing UN 3536 shipping standards.

How does Bess reduce energy costs?

BESS can lower energy costs by storing electricity during off-peak hours when rates are lower and supplying it during peak-demand periods when electricity is more expensive. This helps avoid costly demand charges and reduces overall electricity bills.
