

Kyiv photovoltaic integrated energy storage cabinet high-capacity cluster promotion

Overview

Will Kyiv's energy storage system reach 27% by 2030?

Kyiv wants to up this to 27% by 2030. Other similar energy storage systems in Eastern Europe include Lithuanian electricity transmission system operator Litgrid's 200-MW units launched in 2023 and a 55-MW battery energy storage system in Razlog in southwestern Bulgaria that went online in 2024.

Is DTEK the largest private investment in Ukraine's energy sector?

It marked the largest ever private investment in Ukraine's energy sector. Unlike other state-owned energy companies in Ukraine, DTEK hasn't been able to secure funding from the European Bank for Reconstruction and Development (EBRD).

What are battery energy storage facilities?

Battery energy storage facilities are like a large power bank connected to energy grids, and are crucial for storing energy created by renewables like solar and wind for later use. The share of renewable energy in Ukraine's grid was about 10% before Russia's full-scale invasion. Kyiv wants to up this to 27% by 2030.
