

Lome inverter cabinet 350kw

Overview

How many MPPTs does a CPS flexom inverter have?

Each inverter includes 15 MPPTs and is available with 30 unfused PV string inputs. The CPS FlexOM solution enables communication, controls and remote product upgrades. Our 350kW inverter units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid.

How many MPPTs does a sch275ktl inverter have?

The SCH275KTL inverters include 12 MPPTs and are available with either 36 fused PV string inputs or 24 unfused PV string inputs. The CPS FlexOM solution enables communication, controls and remote product upgrades. The new CPS 250 kW-600 V three-phase string inverters are designed for ground mount applications.

What is a NEMA Type 4X inverter?

The units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid. High efficiencies, wide operating voltages, broad temperature ranges and NEMA Type 4X enclosure enable this inverter platform to operate at high performance across many applications.

How many strings can a CPS flexom inverter handle?

The Standard Wire-box includes touch safe fusing for up to 20 strings. The CPS FlexOM Gateway enables communication, controls and remote product upgrades. The 100kW high power CPS three phase string inverters are designed for ground mount applications with 480Vac service voltage.
