

Luxembourg promotes the construction of new energy storage power stations

Overview

Think Bigger, Smaller, and Smarter Solid-state batteries promising 2x storage density Graphene supercapacitors for instant energy bursts Bi-directional charging stations doubling as emergency power banks Why Your City Might Be Copying Luxembourg Tomorrow With 83% public.

Think Bigger, Smaller, and Smarter Solid-state batteries promising 2x storage density Graphene supercapacitors for instant energy bursts Bi-directional charging stations doubling as emergency power banks Why Your City Might Be Copying Luxembourg Tomorrow With 83% public.

On Wednesday 9 July 2025, Luxembourg's Minister of the Economy, SMEs, Energy and Tourism, Lex Delles, presented the strategic roadmap for the promotion and development of electricity storage batteries in Luxembourg: "Späicherstrategie Lëtzebuerg". This strategy outlines the role of storage.

With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure. The strategy, announced on 9 July, aims to maximise the added value of storage batteries for end consumers and the electricity.

when you hear "Luxembourg City energy storage power station," your first thought might be "cool tech, but how does it affect my latte?"

" Here's the kicker: this 112 MW facility isn't just storing electrons. It's reshaping how Europe's greenest capital tackles energy security while maintaining its #1.

Why a dedicated strategy for battery storage?

Thank you! THANK YOU! value.

ts energy and climate objectives by 2030. Submitted to the European Commission, this roadmap aims to reduce greenhouse gas emissions by 55%, increase renewable energy sources to 25% of the energy mix tteries and other energy storage options. Luxembourg has generous support programmes for energy.

In Q2 2024, the city recorded 42 voltage fluctuations in its power grid - that's 60%

higher than neighboring cities. With renewable energy now covering 31% of its electricity demand, Luxembourg City's facing a modern dilemma: how to keep the lights on when the sun isn't shining and the wind stops.
