

Mauritania hydrogen energy small cabinet station

Overview

In February 2025, Danish Greentech firm GreenGo Energy signed an agreement with the Ministry of Petroleum, Energy and Mines to develop the Megaton Moon project - an integrated green hydrogen, ammonia and energy hub.

In February 2025, Danish Greentech firm GreenGo Energy signed an agreement with the Ministry of Petroleum, Energy and Mines to develop the Megaton Moon project - an integrated green hydrogen, ammonia and energy hub.

Mauritania is positioning itself as a leading hub for green hydrogen in Africa, backed by vast wind and solar potential. The government has introduced a Green Hydrogen Code (2024), offering tax incentives and a clear legal framework to attract major investors. Several large-scale projects.

It is a pioneer in renewable "Power-to-X" projects, particularly in clean hydrogen. It has vast renewable energy potential and, as a major iron ore exporter, is seeking to transform its economy with the production of low-carbon molecules and the development of green steel manufacturing. In parallel.

Mauritania has excellent renewable energy prospects making it a potential leading green hydrogen producer in Africa. Significant green hydrogen project developments and Mauritania's proximity to the European market has the potential to increase export benefits, in addition to providing power to the.

Mauritania is rapidly emerging as a strategic hub for green hydrogen development, driven by multi-billion-dollar projects and regulatory reforms. Last year, over \$75 billion was invested globally in the green hydrogen sector, with Mauritania joining the momentum through initiatives led by CWP.

We are an apolitical association founded on May 7, 2024, by high-level Mauritanian personalities and experts (including a former minister, the former president of University of Nouakchott, and senior consultants). Contributing to the development and strengthening of national skills. Providing.

NOUAKCHOTT, March 27, 2025 - The World Bank Group today approved the Mauritania Development of Energy Resources and Mineral Sector Support Project —known as the DREAM Project —to boost green hydrogen development, expand

energy storage, and support critical reforms in the mining sector. “The.
