

# New Zealand Photovoltaic Energy Storage Battery Cabinet 500kW

## Overview

---

Why do New Zealand homes need battery storage?

In most New Zealand homes, a large proportion of the energy produced by solar panels is sent back to the grid because it's generated when it's not needed, i.e., the middle of the day. However, adding home battery storage to a new or existing solar power system allows you to store your unused energy.

Should I add home battery storage to my solar power system?

However, adding home battery storage to a new or existing solar power system allows you to store your unused energy. This makes your solar energy setup more efficient and maximizes the benefits of your solar PV installation.

What voltages are available for a battery energy storage system?

All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages. Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO<sub>4</sub>) battery packs connected in high voltage DC configurations.
