

North American Data Center Battery Cabinet 120kW Rental Service

Overview

Are Natron battery cabinets a good choice for a data center?

Natron's sodium-ion batteries offer superior reliability and industry-leading lifecycle capacity and require minimal maintenance when compared to other data center battery solutions. Our standard battery cabinets do not require any type of active cooling to function properly, eliminating that risk from your operations as well.

Why do data centers need a high cycle battery?

The increase of Artificial Intelligence (AI) loads has changed the landscape of data center critical power requirements and high power, high cycle battery solutions are now more important than ever. No other battery is as suited to this critical need as Natron's BluePack™.

What are Arimon battery cabinets?

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors.
