

Off-grid solar cabinet small model genuine product guarantee

Overview

What are small off-grid solar kits?

Our small off-grid solar kits are designed for smaller structures like cabins, treehouses, and tiny houses. These kits are designed for lower wattage output for smaller off-grid applications.

Where can I buy off-grid solar panels?

ShopSolar is a great off-grid solar system depot for DIY enthusiasts. It specializes in complete off-grid solar kits tailored specifically for every customer, and it ships panels, batteries and other necessary system components right to your door.

How much power does an off-grid solar system need?

Typically, we recommend kits ranging from 60 to 720 watts for smaller homes, depending on how many devices and appliances need power. If you'd like further information in order to make the optimal decision regarding your off-grid small home solar system kit, you can contact one of our specialists who can guide you through the process.

What is a "off-grid" Solar System?

Truly "off-grid" solar systems are commonly installed on remote properties or in RVs or boats, where all the solar energy is stored onsite. The majority of residential solar systems, however, are grid-tied and send the excess power they produce to the electric utility.
