Engineered to protect critical energy components, our outdoor-rated waterproof metal cabinets offer robust protection for solar battery modules, lithium-ion systems, and emergency power storage units. Whether your project involves off-grid energy storage, telecom backup stations, or smart grid.

AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system.

It lets you place storage right where the power is generated or needed, cuts installation headaches, and keeps everything running smoothly no matter what the weather throws at it. Think of it as a tough, all-in-one box built to live outside year-round. Inside sits the lithium battery pack.

The 100kW 215kWh Outdoor ESS Cabinet is an advanced, all-in-one lithium battery energy storage solution designed for off-grid power systems, remote industrial sites, microgrids, and commercial energy backup. It integrates a high-efficiency inverter, modular LiFePO4 battery banks, and a smart energy.

Choose a cabinet that fits your solar system's needs. Matching parts make setup easier and work better together. Focus on safety features like sturdy locks and alarms to stop theft. A safe cabinet helps you worry less. Think about how much value the cabinet gives over time. Spending more now can.

Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is

called a "battery enclosure", or what is.
