

Pge solar energy storage cabinet lithium battery energy storage

Overview

How much energy will PGE store in 2035?

By 2035, the company aims to develop new storage facilities with a total capacity exceeding 10,000 MWh. Currently, PGE's most advanced energy storage initiative is the Żarnowiec Battery Energy Storage System, with a capacity of 262 MW and storage potential of around 981 MWh, scheduled to begin operations in 2027.

What is PGE Group's energy storage portfolio?

Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems. The planned investments will help diversify the utility's storage portfolio.

Where is PGE's new solar storage facility located?

The planned battery storage facility is located about 10 km from the Baltic Sea. It will help balance the integration of renewable energy, including PGE's own solar farms as well as onshore and offshore wind parks.

How much is PGE Group worth?

Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion). Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems.
