These 40 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions. These are complete PV solar power systems that can work for a home or business, with just about everything you need to get the system up and running quickly.

What is a 40kW Solar Kit?

A 40kW Solar Kit is a complete PV power system that can work for a home or business. It includes hardware components only and does not include labor. This kit can require over 2,300 square feet of space and provides 40,000 watts of DC direct current power.

How to choose a 40kW Solar System?

While grid-tie configuration is the most common choice, you can also go for hybrid or off-grid design. The problem with a 40kw solar system with batteries is getting storage of a capacity that is large enough. Battery storage provides backup during power outages in the grid. However, it's going to greatly increase your expenses.
