

Price List for 500kW Intelligent Photovoltaic Energy Storage Battery Cabinet

Overview

What is the energy storage system?

The energy storage system consists of a battery pack, battery management system (BMS), and battery charger. To discuss pricing and options, please, place an order and we will give you a call or give us/Carl a call. One of the largest energy storage battery banks available! Max. Voltage of battery pack Max. Current Max. Charging current.

What is a p500e energy storage system?

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

What is a p500l PV system?

The P500L has a modular design and its main role is to convert the DC power generated by the PV panels into AC power for integration into the grid or for local use. At the same time, the P500L is equipped with features such as Maximum Power Point Tracking (MPPT) to maximise the efficiency of the PV system.
